I'm 14 agenda is the introduction of staff, Mr. Broderick. 14 presenting on some of the proposed rulemaking that 15 MR. BRODERICK: I'm Mike Broderick. I'm the 15 will be voted on at the next council meeting. 16 manager of the Radiation and Management Section. And NRC has proposed several changes to the CFR 17 I can't see my Brady Bunch thing. I know we have at 17 that we will be incorporating by reference. Most of 18 least one member of the public present, your 18 them are changes to who to send documents to, changes 19 assistant, George. Casey Schmitz is present. She in organization for NRC, but we are incorporating all 20 works with George at the Health Science Center. 20 the changes that they have made. Some of the larger 21 Were there any other members of the public 21 changes will be the -- in 10 CFR 37, the address for

23

25

22 present? I guess not.

24 yours staff, Mike?

MR. MACDURMON: And do you want to introduce

MR. BRODERICK: Okay. I'm Mike Broderick.

22 submitting fingerprints has changed, the address for

24 addresses for information to be sent to NRC. We are

25 exempting those and those notices should be sent to

23 that. In 10 CFR 37 and 10 CFR 71 there's lots of

Page 9

1 DEQ instead.

In 10 CFR 35 medical events, instead of using
3 a Social Security number you can use an ID number of
4 the affected parties to prevent fraud. And 10 CFR
5 34.47 to allow use of electronic dosimetry. For
6 years now, at least the NRC had since 2018, but now
7 they are updating it and putting it into their -8 into the CFR. So instead of language that says your
9 badges will have to be replaced quarterly, the badges
will just have to be evaluated quarterly. So these
11 are for badges like Instadose where you insert them
12 and you upload your dosimetry on a different basis
13 than you would instead of switching a badge in and
14 out, so that allows for those types of devises in the
15 CFR.

The next change is at that statute for occupation licensing for military and military spouses. The only occupational licensing that we do is our industrial radiography certification. And the way that it's set up, it also goes above and beyond this. We have receprocital recognition of any states' industrial certification. And any -- in industrial, anybody that is licensed in another state, when they come to Oklahoma, that we expedite

25 their licensing in Oklahoma or give a reciprocital

So that's all I have for new rules that are coming, proposed rules.

3 MR. MACDURMON: Do you have anything to add 4 to that, Mr. Broderick?

Page 11

Page 12

5 MR. BRODERICK: I don't think so. I will
6 mention — Keisha mentioned that the rules, the NRC
7 rules, the changes we are making of addresses where
8 you report stuff to NRC. She made reference to it
9 but people are still required — in Oklahoma under
10 our jurisdiction, they reported to us. There is
11 another part of our rules that basically specifies

where to report to us at.
 MR. MACDURMON: Okay. The next thing on the
 agenda are your report of section activities and

13 MR. MACDORMON: Okay. The next fining on the 14 agenda are your report of section activities and 15 events, Mr. Broderick.

MR. BRODERICK: Thank you, George.
We are still operating from home. We have
limited operations in the office now for things like
mail and changing filters on an airborne radiation,
things that have to be done in the office. The virus

21 situation appears to be improving and there's a good

22 possibility it will change -- that will change before23 long but I haven't heard anything from upper

23 long but I naven't heard anything from upper24 management. And it's just dependent, and you're

25 going to hear me say these words a lot in the next

Page 10

1 recognition of that.

And we have added language in there that says
all of our certification requests for active military
personnel and their spouses will be processed
pursuant to that statute, but we already do by
recognizing all the other states' industrial
radiography certification meets that specification
already.

The next one we have a Executive Order No. 2020-03. This was signed by the governor in February 3rd of 2020. This is about new regulations. For every new regulation that the agency proposes, for every one new regulation, two existing regulations are to be revoked. So we have identified some outdated regulations in our Section 19, which was X-ray, lead based paint x-ray in that section has been revoked before but there were some outdated regulations that referred back to that lead-based

19 paint XRF regulations so those will be deleted.
20 And there were some industrial radiography
21 certification language that will be revoked that says
22 that whenever an out of a state radiographer wants to
23 come into Oklahoma, that they would need to apply for
24 reciprocity, and we will take out the language that
25 says that they need to apply for reciprocity.

1 two minutes, depends on what happens with the virus2 situation.

Now, a year ago we issued a memo to our licensees about exercising enforcement discretion on

5 requirements that posed a risk of spreading the6 virus. It allowed people to delay things like

7 radiation safety committee meetings or conduct them

8 over zoom and some face-to-face things. It's been in9 effect a year now which is a long time, and we

10 evaluated it and we have decided right now the -- we 11 want to leave it in effect. We can't leave it in

12 effect indefinitely but we are hoping the virus

13 situation will improve and we can modify or cancel

that soon.
 We are still doing remote inspections almost
 entirely. We did -- for a while we did some field

16 entirely. We did -- for a while we did some field
17 inspections of high-risk operations at temporary job
18 sites, mostly industrial radiography, but we have
19 largely pulled back with that because of the virus
20 concerns over the winter. And, again, how the -21 subject to how the virus situation goes, this may

22 change. Hopefully we'll get back to doing field 23 inspections.

Now, our next RMAC meeting is in September.

At this time I don't know -- we don't know whether it
